

DecraSound Acoustic Solutions, Exciting Designs

Groove Sky Suspended Acoustic System

The Groove Sky system is a suspended acoustic structure, which transforms into a grid-like system that can transform the acoustics and interior space of any room.

The struts effectively trap the noise between them making it ideal as a noise dampener. This acoustic ceiling system has been designed to allow for gaps which allow you to build the acoustic system around the existing light fittings without any obstruction. This modular PET acoustic system can be designed and assembled into a range of configurations.

Features & Benefits

- Enhance the interior styling of a space with our extensive colour palette.
- Environmentally friendly noise control solution.
- Humidity and moisture resistant.
- Odourless, low-VOC content and non-toxic.
- Fire rated to Australian, European and American Standards: Group 1 Fire Rating AS5637 ISO9705, ASTM E84 Class A, EN 13501-1:2007 +A1:2009 Class B
- Outstanding quality and excellent acoustic performance.
