DEW Suspended Acoustic System

DEW harnesses form and function in this high performance, suspended acoustic system. Each cloud is fully customisable to size, volume and colour and can be created to fit any space, from small studio spaces and offices through to large, multi-volume reception areas, galleries and auditoriums.

These infinite assembly configurations allow artistic design potential to be redefined, ensuring every environment stands out as a unique architectural statement and transforming ceilings and soffits into exciting, sound absorbing suspended landscapes.
