Kaya Acoustic Divider System

Kaya is highly modular, acoustic building block system which will take you back to your Lego building days. All you need is your imagination and an office canvas you can completely customise by creating dividing walls, break-away rooms and enclosed or partially enclosed spaces to separate areas, the possibilities are endless.

Kaya has an industrial look and feel which you can configure in any desired length and height creating apertures, doorways and corridors, by sectioning off any available space. There are multiple standard sized building blocks and each block has a double skinned cavity which geometrically interlocks into one another to create a customised acoustic wall for any environment which, due to the modularity, can continually evolve, be reconfigured or repurposed.

Features & Benefits

- Enhance the interior styling of a space with our extensive colour palette.
- Environmentally friendly noise control solution.
- Humidity and moisture resistant.
- Odourless, low-VOC content and non-toxic.
- Fire rated to Australian, European and American Standards: Group 1 Fire Rating AS5637 ISO9705, ASTM E84 Class A, EN 13501-1:2007 +A1:2009 Class B
- Outstanding quality and excellent acoustic performance.
